

Willwood Irrigation District consists of:

11,600 Acres

27 miles of main canal

53 miles of laterals and pipelines

54 miles of open drains

20 miles of closed drains

51 canal gates

19 Laterals

205 Landowners

Water Distribution Plans: If needed, we would like how the water will be delivered from said head gate. And have all waste ditches indicated with easements. Open drains we recommend easements for Irrigation personnel to do needed work on premises. If we believe there are buried drains in the area we would like them located on maps, to prevent anyone from building on them. If need be, we recommend Engineering Firms to come and verify this with us. We have maps that show the rough location of buried tile drains.
